Executive Summary

Motivated B.Tech student in Electronics and Communication Engineering (ECE) with a strong foundation in IoT, embedded systems, and core electronics. Hands-on experience gained through an IoT internship, PCB design training, and academic projects. Proficient in Arduino, sensors, Python, and Java, with well-developed analytical and problem-solving skills. Eager to secure an entry-level position in Embedded Systems, IoT, or Electronics to contribute effectively while advancing technical expertise.

Education

Bachelor of Technology (B.Tech)– Electronics and Communication Engineering **Expected Graduation:May 2027**

Dadi Institute of Engineering and Technology, Andhrapradesh

CGPA: 8.21/10(till now)

Intermediate (Diploma) – Electronics and communication Engineering (ECE) **April 2024**

DIET,Anakapalli,A.P

Percentage : 75.89%

Secondary School (class x) – Z P High School **June 2021**

Narsipatnam , A.P

CGPA : 9.39/10

TECHNICAL SKILLS

Programming Languages: Java , Python

Embedded Systems: Arduino, Sensors, PLC Ladder Logic

Tools & Platforms: Arduino IDE, VS code, Pyriod3

Projects

Wi-Fi Controlled Talking Robot

- Designed and developed a Wi-Fi-enabled robot capable of remote communication and control using embedded systems.
- Integrated microcontroller (Arduino/ESP module) with wireless communication for real-time operation.
- Implemented voice output system to enable the robot to speak predefined messages.
- Developed control interface using mobile or web-based application for user interaction.
- Gained hands-on experience in IoT, wireless communication, and embedded system design.

Student Management System (Java)

- Developed a console-based application using Core Java
- Implemented CRUD operations using ArrayList
- Used OOP concepts like classes, objects, and methods
- Improved understanding of Java collections and logic building

INTERNSHIPS / TRAINING

PCB Design Workshop – Dadi Institute of Engineering and Technology **3-10-2023 to 7-10-2023**

Completion Certificate: [[view certificate](#) ]

* Schematic design, PCB layout, and routing | Fabrication and testing of electronic circuits |

IoT Intern – CEMS (Central Intelligence of Maritime and Ship Building) **4-12-2023 to 20-5-2024**

Completion Certificate: [[view certificate](#) ]

* Arduino-based IoT systems using sensors and Wi-Fi | Development, testing, and monitoring of automation solutions | Exposure to industrial and maritime IoT applications |

Full stack TCS Ion Career Edge – young Professional course **19-4-2026 to 4-5-2026**

Completion Certificate: [[view certificate](#) ]

*Communication skills | Thinking skills for workplace success | Presentation skills | Soft skills |
Resume writing | Group Discussion skills | Interview skills | Effective Email Writing |

Certificates

- Creative Thinking and Design Thinking | Infosys Springboard [view ] Jan 2025
- RTL coding and FPGA design | [view] 22nd Dec 2025 – 16th Feb 2026
- Android Developer virtual internship | [view ] June 2025
- Embedded system developer virtual internship | [view ] jan-mar 2025
